

Latin American Utility Week 2017

MEDIA ALERT

METERS AND MORE to Speak at Latin American Utility Week 2017

Visit the Meters and More Booth #A.10 to learn much more about the Association

BRUSSELS, BELGIUM, September 15, 2017 –METERS AND MORE AISBL, the global, non-profit, industry organization that maintains and promotes the most widely deployed communication protocol for smart metering, today announced that Meters and More representatives will be speaking at the upcoming **Latin American Utility Week (LAUW 2017)**, taking place **September 19th-21st in São Paulo, Brazil**. LAUW 2017 is the premier platform for electricity utility stakeholders in Latin America, focusing on regional and global developments in metering and transmission and distribution technologies.

The Meters and More smart metering information and telecommunication protocol, has been extensively rolled out in Europe. Have been installed more than 44 million Meters and More smart meters. The success of these implementations brings many advantages for customers through the new smart meters that use the Meters and More technology.

In their presentation at LAUW, **Ricardo Freitas** of STMicroelectronics and **Adalberto Pereira** of Landis+Gyr, will explore how the open communication protocol developed by Meters and More is powering on-going pilot projects that are contributing to the development of energy networks in Brazil, Chile, Colombia, Peru, and Argentina.

Event Details:

What: Metering & Smart Grids Conference

Presentation Title: ***METERS AND MORE...Latin America experience***

-- *Minimum functional requirements of a smart meter system*

-- *Key features of Meters and More technology*

-- *Meters and More on-going pilot projects*

When: September 20th, from 3h20 pm to 4pm

Speakers: Jose Ricardo Freitas of STMicroelectronics and Adalberto Pereira of Landis+Gyr.

Where: Transamerica Expo Center, São Paulo, BRAZIL.

About METERS AND MORE

METERS AND MORE is a global non-profit industry organization that maintains and promotes the METERS AND MORE protocol for bidirectional data transfer in Advanced Metering Infrastructure (AMI) systems. This new generation powerline communications protocol is internationally recognized as a standard protocol for smart grid communications at CENELEC (CLC/FPrTS 50568) and it is the most widely deployed communication protocol for remote meter management. Currently used in smart metering and smart city projects across Europe, Latin America and Asia, it builds on the experience of ENEL's Telegestore, the largest AMI solution in operation worldwide that connects over 40 million customers. METERS AND MORE also powers the smart meters that Endesa is installing for its 13 million domestic and commercial customers in Spain – the largest ongoing smart meter roll-out in Europe. The Association provides a certification process that offers a designation of interoperability and quality for compliant-products and supports widespread adoption of the METERS AND MORE protocol by providing a forum for further technology development and enhancements for applications beyond the meter and market building programs. Founded in 2010, METERS AND MORE has over 40 members including leading technology providers, meter manufacturers, system integrators, distribution system operators, technological service providers and other institutions. The Association is governed by Belgian Law (Association Internationale sans but lucratif – AISBL).
