

**Latin American Utility Week 2016**

## **MEDIA ALERT**

### **METERS AND MORE to Speak at Latin American Utility Week 2016**

*Visit the Meters and More Booth #B.09 to learn much more about the Association*

**BRUSSELS, BELGIUM, September 13, 2016** - METERS AND MORE AISBL, the global, non-profit, industry organization that maintains and promotes the most widely deployed communication protocol for smart metering, today announced that Meters and More representatives will be speaking at the upcoming **Latin American Utility Week (LAUW 2016)**, taking place **September 13-15 in São Paulo, Brazil**. LAUW 2016 is the premier platform for electricity utility stakeholders in Latin America, focusing on regional and global developments in metering and transmission and distribution technologies. At the event, Mr. Victor Manuel Galvão Macedo Costa of Ampla, and Mr. Jose Ricardo Freitas of STMicroelectronics, will explore how the open communication protocol Meters and More is powering on-going pilot projects that are contributing to the development of energy networks in Brazil, Chile, Colombia, Peru, and Argentina.

Meters and More will also be exhibiting at LAUW 2016 in **Booth B.09**.

#### **Event Details:**

**What:** LAUW 2016 Conference Session Track on Metering

Presentation Title: ***METERS AND MORE...Latin America experience***

- *Minimum functional requirements of a smart meter system*
- *Key features of Meters and More technology*
- *Meters and More on-going pilot projects*

**When:** Wednesday, September 14, 10:40 – 11:20 a.m.

**Who:** Mr. Victor Manuel Galvão Macedo Costa of Ampla, and Mr. Jose Ricardo Freitas of STMicroelectronics.

**Where:** Transamerica Expo Center, São Paulo, BRAZIL.

### **About METERS AND MORE**

METERS AND MORE is a global non-profit industry organization that maintains and promotes the METERS AND MORE protocol for bidirectional data transfer in Advanced Metering Infrastructure (AMI) systems. This new generation powerline communications protocol is internationally recognized as a standard protocol for smart grid communications at CENELEC (CLC/FPrTS 50568) and it is the most widely deployed communication protocol for remote meter management. Currently used in smart metering and smart city projects across Europe, Latin America and Asia, it builds on the experience of ENEL's Telegestore, the largest AMI solution in operation worldwide that connects over 40 million customers. METERS AND MORE also powers the smart meters that Endesa is installing for its 13 million domestic and commercial customers in Spain – the largest ongoing smart meter roll-out in Europe. The Association provides a certification process that offers a designation of interoperability and quality for compliant-products and supports widespread adoption of the METERS AND MORE protocol by providing a forum for further technology development and enhancements for applications beyond the meter and market building programs. Founded in 2010, METERS AND MORE has over 40 members including leading technology providers, meter manufacturers, system integrators, distribution system operators, technological service providers and other institutions. The Association is governed by Belgian Law (Association Internationale sans but lucratif – AISBL).
