

**METERS AND MORE is Silver Partner of European Utility Week 2019**

*Visit the Meters and More Booth N140 to discover much more about the Association, the prototype of the Meters and More smart energy “Gateway” and, through a specific demo, how our protocol can support prepayment meters.*

**BRUSSELS, BELGIUM, November 12th, 2019** –METERS AND MORE AISBL, the global, non-profit, Association that maintains and promotes the most widely deployed communication protocol for smart metering, today announced that Meters and More representatives will be speaking at the upcoming **European Utility Week (EUW 2019)**, taking place **12-14 November, Paris France**.

The Meters and More smart metering information and telecommunication protocol has been extensively **rolled out in Europe and in Latin America where 50 million of Meters and More smart meters have already been installed**. The success of these implementations brings many advantages for customers through the new smart meters that use the Meters and More technology. But the Association’s declared goal is not only to provide an interoperable end-to-end solution for smart metering, but also to develop extensions for complementary **value-added services** based on the same principles of openness, interoperability, efficiency, robustness and security of communications. The Association in fact, consider customer awareness a fundamental step to obtaining reductions in energy consumption and demand. For these reason, in the exhibition **booth N140** is possible to discover a prototype of the Meters and More smart energy **“Gateway”**, a system for communication between the smart meter and in-home devices, and a **Prepayment Demo**, a specific demo concerning how the meters and more protocol can support prepayment meters. **To understand the benefits concerning the Meters and More’s technology , the Association invites to visit them at their stand where some experts be available for meeting.**

**Events Details:**

**HUB SESSION 4**

12 nov. h17:00

***Consumer and the Digital Utility***

**Alessandro Lasciandare**

**Member of Meters and More**

**TCS Commettee**

**SUMMIT SESSION 2**

13 nov. h11.40

***The Digital Utility Trasformation***

**Alessio Montone**

**Director of Meters and More**

**(E-Distribuzione)**

### **About METERS AND MORE**

METERS AND MORE is a global non-profit Association that maintains and promotes the METERS AND MORE protocol for bidirectional data transfer in Advanced Metering Infrastructure (AMI) systems. This new generation powerline communications protocol is internationally recognized as a standard protocol for smart grid communications at CENELEC (CLC/FPrTS 50568) and it is the most widely deployed communication protocol for remote meter management. Currently used in smart metering and smart city projects across Europe, Latin America and Asia, it builds on the experience of ENEL's Telegestore, the largest AMI solution in operation worldwide that connects over 50 million customers.

Founded in 2010, METERS AND MORE has over 45 members including leading technology providers, meter manufacturers, system integrators, distribution system operators, technological service providers and other institutions. The Association is governed by Belgian Law (Association Internationale sans but lucratif – AISBL).
